REQUEST FOR REFUND

Sir:

We have received the Monthly Statement of Deposit Account for Deposit Account No. 06-1382 (copy attached). An erroneous charge appears on this statement for the above-identified patent application.

More specifically, our deposit account has been erroneously charged \$72.00 under Fee Code 2615 (i.e., "Claims - extra total (over twenty)") and \$150.00 under Fee Code 2616 (i.e., "Claims - multiple dependent") for a total erroneous charge of \$222.00.

Please note that the instant national-stage PCT application was filed on December 6, 2004. The application as filed contained nine total claims and one independent claim (see enclosed copy of Form PTO-1390). Thus applicant should not have been charged for over twenty claims. A Preliminary Amendment was filed with the application which amended Claims

3-6, 8 and 9 to eliminate multiple dependencies therein (see attached copy of Preliminary Amendment Cancelling Claims dated December 6, 2004). The first and last paragraphs of said Preliminary Amendment specifically instructed that the amendment was to be entered prior to calculation of the filing fee. Consequently, the total filing fee for this application was \$475.00 as calculated on Form PTO-1390.

A check for \$475.00 was enclosed with the application, and said check was received and deposited by the U.S. Patent and Trademark Office. (See enclosed postal card date-stamped on December 6, 2004 and enclosed copy of Check No. 025823.)

A credit to our Deposit Account (No. 06-1382) in the amount of \$222.00 is in order, and such is respectfully requested.

Listing of Claims

1. (Original) A pipe coupling for connecting together the ends of two pipes, comprising a tubular casing (12), a tubular sealing sleeve (13) inside the casing, and tensioning means (25) for tightening the casing around the sealing sleeve, the arrangement being such that when the coupling is placed around the ends of two pipes to be connected and the tensioning means are tightened the casing presses the sealing sleeve against the pipe ends to form seals, the casing (12) comprising a strip of metal formed into a tube with a gap (14) extending longitudinally of the casing between the free ends of the strip, the tensioning means (25) interconnecting the free ends of the strip, characterised in that the free ends of the strip are bent outwardly to form radially projecting flanges (15) extending longitudinally of the casing on opposite sides of the gap (14), the two flanges being placed between two reinforcing members (20), the tensioning means passing through sets of aligned holes (30, 31, 32, 33) in the reinforcing members (20) and the flanges (15), the reinforcing member having an angled cross-section and extending substantially the length of the coupling.

2. (Original) A pipe coupling according to claim 1 in which the casing has circumferentially extending end flanges (17) projecting inwardly from the axial ends of the casing.

3. (Currently Amended) A pipe coupling according to claim 1 ~~or 2~~ in which each reinforcing member has a web portion through which the holes (30) for the tensioning means pass, and a flange (21) running along the longitudinal edge of

the web portion that is nearer to the axis of the coupling,
the flange bearing against the tubular portion of the casing.

4. (Currently Amended) A pipe coupling according to
~~any of the preceding claims~~ claim 1 in which the reinforcing
member has a channel-shaped cross section with flanges (21)
running along both longitudinal edges of the web portion.

5. (Currently Amended) A pipe coupling according to
~~any of the preceding claims~~ claim 1 in which frusto-conical
gripping rings (50) are located within the casing at opposite
ends of the casing, the inner edges (54) of the gripping rings
being formed with teeth (52).

6. (Currently Amended) A pipe coupling according to
~~any of the preceding claims~~ claim 1 in which there are two
sets of aligned holes (30, 31, 32, 33) and the tensioning
means comprise two screw bolts (25) and nuts (34).

7. (Original) A pipe coupling according to claim 6 in
which the nuts (34) are of a size that fits between the sides
(21) of the U-shaped member (20) so as to prevent rotation of
the nuts.

8. (Currently Amended) A pipe coupling according to
~~any of the preceding claims~~ claim 1 in which a backing ring
(55) is provided inside the casing adjacent each gripping ring
(50) between the gripping ring and the sealing sleeve (13) to
prevent the sealing sleeve bulging between the teeth of the
gripping ring.

9. (Currently Amended) A pipe coupling according to
~~any of the preceding claims~~ claim 1 in which an inner sleeve
(45) is provided inside the sealing sleeve to prevent the
sealing sleeve bulging inwardly between the pipe ends.
